

Weathershield Newsflash

Your Company was one of those requesting the introduction of coloured doors by Weathershield Windows Limited. As a result of yours and others' requests we are pleased to announce that, to complement our rosewood and light oak doors, we are now producing coloured doors on a three week lead time.

Doors are available in the following colours:

Burgundy, Poppy Red, Royal Blue, Olive Green and Ebony Black

Based on our existing Eurocell 70mm range we are beginning with one basic design of (front) door. Our coloured doors will comprise a coloured woodgrained effect door sash, mullion and mid-rail. The mullion can be full height or just the bottom half and the door comes complete with bottom infill panels. Left or right hung in white frame the top half of the door will be unglazed.

The doors will be inward opening only and will be fitted with gold furniture. Please state if a letter box is not required.

The doors are available in the following sizes:

between 2000mm and 2100mm high and will be between 850mm and 930mm wide

The above style is available at £380(excluding VAT).
